

SHIMBWE TRUST ANNUAL REVIEW 2005/06

WORKING WITH COMMUNITIES...

The Shimbwe Trust is a Registered Charity set up by Dr & Mrs Tesha to Aid the Development of Shimbwe Ward in Moshi-Tanzania.

The Trustees and Partner organisation, Shimbwe Committee, are enormously grateful to every one who has played part in the success of making easy access to safe and clean drinking water for the community a reality. If it was not for your generosity, the idea of having clean tap water would have remained a dream.

EXCELLENT RESULTS...

It is a fact that every 60 seconds, four people, mainly children, somewhere in the developing world die from water-borne related diseases, because of drinking dirty contaminated water. Your support is already making a difference between life and death to many families, as some of them are already enjoying a supply of safe drinking tap water.

Unfortunately, the rest of the community are desperately longing for the day, when they will too be fortunate enough to enjoy the same privilege. Funds for more piping materials would make it possible for the whole community to enjoy a drink of clean tap water.

Left: Shimbwe Development Trust continues to support the ongoing construction of Shimbwe Secondary School, which opened in 1998.

Below: Staff from The Wheldon School & Sports College visited Shimbwe and went on to climb Kilimanjaro. Sponsorship resulted in personal totals of £600 going to the Trust.
